

Segment #5: US 90 from Cooper Lane to Middle Brook Road

This US 90 segment extends through the town of Holt and is surrounded by a variety of land uses, including residential, vacant residential, commercial, and agricultural. It is a two-lane roadway with paved shoulders, but no sidewalk facilities. Right-of-way ranges from 60–125 feet and the CSX rail line parallels much of the corridor.

During the site assessment think about how a multi-use trail could fit within context of the corridor and what potential hazards and conflicts may exist.

US 90 Corridor
